rightkind™

SAMPLING PLAN · BANGALORE

10,000 sachets in five weeks

Get about 15,000 of the right people to taste RightKind yeast protein, and show which of them buy.

15,000
screened people taste two flavours on the spot

75
stall-days in three clusters, run by two crews

Rs 4L
net cost after stall sales (about Rs 8.7L to run)

2,550
buyers within 30 days (17%), plus feedback from all 15,000

01 · ASSUMPTIONS

What the plan rests on

1 sachet makes

3 cups

of about 80 ml each

10,000 sachets make

30,000 cups

opened and poured in front of people

2 cups a person means

15,000 people

each tasting two flavours side by side

About people

- Our buyers already take protein or want more of it. They need a reason to pick us.
- RightKind costs a little more than other brands, so our buyers choose on **taste** and will pay for it.
- They already buy health products online and on Blinkit, so once they like it, ordering takes minutes.
- Tasting on the spot builds far more intent than a take-home sachet.
- Seeing the brand twice (at work and at home, or at a run and at home) makes people remember it. That is why we cluster.

The numbers we assume, and where they come from

Assumption	Basis
About 17% buy (range 12 to 22%), so about 2,550 people	NoBrokerHood reports 20 to 25% conversion from society sampling. US D2C brands sampling at run clubs (Modern Retail) see 20 to 30%. In-store sampling converts 26% of people trying a new product (Arbitron / Edison, 2008).
People sampled per stall-day: society 300, tech park 350, run club 150	Stalls run 8 to 10 hours with two people always present, so about 30 to 45 people an hour is doable. Run clubs arrive together at the finish.
Cost of one sachet: Rs 20	Given.
Society stall fee: Rs 10,000 a day	Agencies such as Brandland list them at about Rs 17,000 with their own staff; we assume Rs 10,000 going direct.
Amazon and Blinkit allow single-use offer codes	Amazon sellers can already create them. If Blinkit doesn't allow them, we compare Blinkit sales by area.

02 · WHO WE TARGET

Three personas, in order of priority

A persona makes the cut only if our pitch (taste-first, dairy-free protein that feels like an upgrade) fixes a real problem for them, they can pay a premium and buy again, and we can reach many of them cheaply in one place.

High priority ~50% sampled

Active people: runners and pickleball players

Already think about protein and recovery, and like trying new brands. Dairy-free and good taste both appeal to them.

Where: run clubs and pickleball events

High priority ~40% sampled

Health-aware families, parents 30 to 50

One parent buys for the house, so one yes means several users. Vegetarian homes often run short on protein.

Where: weekend stalls in large gated societies

Medium priority ~10% sampled

Tech professionals, 24 to 38

Short on protein and can pay, but rushed and convenience-driven, so less likely to act on one taste. Many also live in the societies we visit.

Where: tech park food courts, Tue to Thu

Who we skip: college students (a Rs 1,699 bag is too much for pocket money) and mall crowds (cheap reach, wrong people).

03 · WHERE

Three clusters, so people see us more than once

We pick clusters on persona density, venues that allow stalls, FirstClub presence (it stocks RightKind) and Blinkit dark stores (launching soon).

7,500

people · 5,000 sachets · 7 Blinkit stores

HSR / Bellandur / Koramangala

All three personas live, work and exercise here.

5,250

people · 3,500 sachets · 9 Blinkit stores

Whitefield / Mahadevapura

The city's biggest societies next to big tech parks.

2,250

people · 1,500 sachets · 5 Blinkit stores

Indiranagar / Domlur

The most visible active crowd and one huge office park.

Left out for now: JP Nagar (few tech parks), Hebbal / Manyata (almost no Blinkit stores), Electronic City (closed campuses), West Bangalore (weakest quick-commerce coverage). Cubbon Park bans commercial activity.

03 · WHERE

Where we find each persona in each cluster

Cluster	Active people	Families	Tech professionals
HSR / Bellandur / Koramangala	HSR Run Club, Runners High, GoRally, CoPlay	Sobha Dream Acres, Adarsh Palm Retreat	Prestige Tech Park, Embassy Tech Village
Whitefield / Mahadevapura	Runners High Whitefield, GoRally Whitefield	Prestige Lakeside Habitat, Prestige Shantiniketan	Bagmane Tech Park, Prestige Shantiniketan campus
Indiranagar / Domlur	GoRally Indiranagar, Indiranagar Runners, 100 Feet Road studios	None listed	Embassy Golf Links

Active people

Run clubs and pickleball events, at the finish. Weekday mornings and evenings.

Families

Weekend stalls in large gated societies.

Tech professionals

Tech park food courts, Tuesday to Thursday.

04 · CHANNELS

75 stall-days, 15,000 people, 10,000 sachets

Active people

Run clubs and pickleball

High priority

51 events
150 people a day
~50% of people and sachets

When: weekday mornings, evenings

How we get in: club captains and venue owners

Health-aware families

Society stalls

High priority

20 days
300 people a day
~40% of people and sachets

When: weekends

How we get in: direct deal with the residents' association; Brandland or NoBrokerHood as fallback

Tech professionals

Tech park stalls

Medium priority

4 days
350 people a day
~10% of people and sachets

When: Tue to Thu

How we get in: the park office or an agency (Brandland, The Media Ant)

What we leave out: **Marathons** (expensive, crowds too big to screen) and **gym partners** (we can't check that members taste it, or track them). Tech parks get the fewest days: expensive, and a medium-priority persona.

05 · THE SAMPLING MOMENT

Screen, taste, feedback, all in a few minutes

1 Soft screen, 20 seconds

2 Taste 2 flavours side by side

3 Give feedback

4 Register on WhatsApp

5 Leave with an offer code

Soft screen

1. Do you take any protein product now, or are you trying to add more protein to your diet?
2. Do you work out or play a sport at least once a week, or avoid dairy?
3. Do you order groceries or health products online?

We prefer people who say yes to 1 or 2, and yes to 3.

Taste

- We open each sachet in front of people and shake it into 3 small cups of about 80 ml.
- Each person tastes 2 flavours and picks one. We rotate the pairs so every flavour gets compared.

Feedback

- How much did you like it, 1 to 5?
- Would you buy it?
- Which of the two did you prefer?
- What would you change?

Captured while they drink. Every answer is saved against their registration, so it doubles as product research.

What pulls a crowd

- **Protein check:** people enter their weight and meals and see the protein they need against what they eat. Doubles as screening.
- **Blind taste test** against a leading protein shake, with a live scoreboard, in societies where people have time.

Two people at every stall, two stalls at most

Who runs a stall

- **Brand lead** (RightKind team): pitches, pours the cups, answers questions, sells
- **Brand associate** (college intern hired for the campaign): screens people, points them to the QR code, hands out cups
- **Creator:** films reactions for RightKind's Instagram
- **Team:** two crews, so 2 people from the RightKind team and 2 interns

Stall	Hours	Per day	Pace
Society	9 am to 7 pm	300	30 an hour
Tech park	10 am to 6 pm	350	45 an hour
Run club	6 to 8 am	150	A rush at the finish

Stall kit, 2 sets

Branded table and backdrop, claim and QR standees, shakers, cold box, tablet. Run clubs: a folding table and the QR standee.

Selling on the spot

Society and tech park stalls sell sachets at Rs 150 and 8-sachet boxes at Rs 999. Run clubs don't sell.

Training

A 2-hour brief, a 30-second pitch and ready answers to common questions.

07 · TRACKING AND FOLLOW-UP

Every purchase traces back to a stall

1
Scan the stall's QR code

2
WhatsApp opens with the stall code typed in

3
We get their number, venue and permission to message

4
Associate adds persona, flavour and feedback

Where they buy	How we know it came from sampling
At the stall	The brand associate marks the person as a buyer when they register.
RightKind website	Match order phone numbers to our list, plus a sampling-only offer code.
Blinkit / FirstClub	A brand-funded offer code only sampled people get. Backup: compare sales in sampled clusters against similar areas with no stalls.
Amazon	Single-use claim codes sent on WhatsApp, one per sampled person.

Follow-up on WhatsApp

Personalised messages on days **0, 3, 10 and 21**, based on each person's flavour, feedback, protein check result and where we met them.

What we measure

- **Buyers within 30 and 60 days**, by channel, cluster, venue type and persona
- **Repeat buyers** at 60 and 90 days
- **Taste scores and flavour picks:** which flavour wins with each persona
- **Cost per buyer** for each venue type

08 · COST

About Rs 4 lakh net, Rs 8.7 lakh to run

Item	How we got it	Rs	Share
Running the stalls			
Sachets	10,000 x Rs 20	2,00,000	23%
Society stalls	20 days x Rs 10,000	2,00,000	23%
Tech park stalls	4 days x Rs 40,000 avg	1,60,000	18%
Run clubs, pickleball	51 events x Rs 2,000	1,02,000	12%
Interns	2 x Rs 20,000 x 1.5 months	60,000	7%
Stall kits	2 sets x Rs 15,000	30,000	3%
Cups, shakers, ice	30,000 small cups	30,000	3%
Creator, transport	Creator 15,000; cabs 30,000	45,000	5%
After the stall			
WhatsApp follow-up	Tool, ~3 messages to 15,000	45,000	5%
Total		8,72,000	100%

Estimated sales at the stalls

Sampled where we sell	**7,400**
Buy at the stall (17%)	**~1,260**
Average order	**Rs 500**
Sales	**~Rs 6.3L**
Gross margin (75%)	**~Rs 4.7L**

Net cost **~Rs 4L**

Only society and tech park stalls sell (6,000 + 1,400 people). Order: half sachets, half boxes. A sachet costs ~Rs 20, sells for Rs 120 to 150.

09 · TIMELINE

Five weeks in the field, plus a week to prepare

When	Societies	Tech parks	Run club and pickleball	What happens
Prep week	0	0	0	Book venues, hire and train the 2 interns, print kits, set up WhatsApp and the offer codes, confirm the Blinkit offer.
Week 1 (pilot)	4	1	9	Test every venue type. Check footfall, how many pass the screen and taste scores; fix the pitch and the numbers.
Weeks 2 to 4	12	3	33	Full run with both crews: weekends in societies, weekdays at run clubs, pickleball and tech parks.
Week 5	4	0	9	Last stalls; WhatsApp follow-ups run.
Total	20	4	51	75 stall-days
Day 30 and 60 after				Report: buyers by channel, cluster and persona; repeat rate; cost per buyer; flavour feedback.

rightkind™

IN SHORT: WHAT RIGHTKIND GETS

2,550 buyers in 30 days, each traced back to a stall

2,550
buyers within 30 days, about 17% of the 15,000 people sampled

15,000
people's taste scores and flavour picks, so we know which flavour wins

Rs 4L
net cost after stall sales (about Rs 8.7L to run)

Reports at day 30 and 60: buyers by channel, cluster and persona, repeat rate, cost per buyer and flavour feedback.
